

Amendments to the Claims:

The following listing of claims will replace all prior versions, and listings, of claims in the application:

1. (Currently Amended) A mobile terminal~~An electronic apparatus that includes a device to display~~, comprising:

an organic electroluminescent device to display~~that displays including organic electroluminescent elements having an anode, a cathode, and at least one organic light emitting layer interposed between the anode and the cathode~~; and

a liquid crystal device to display images, the mobile terminal being capable of being folded such that the organic electroluminescent device faces inside while the liquid crystal device faces outside~~that displays~~.

2. (Canceled)

3. (Currently Amended) The mobile terminal~~electronic apparatus~~ according to claim 1, when not manipulated for a predetermined period or during stand-by, said organic electroluminescent device being in a non-display mode, and only said liquid crystal device being in a display mode.

4. (Amended) The mobile terminal~~electronic apparatus~~ according to claim 1, said organic electroluminescent device being driven by an active matrix driving method.

5. (Amended) The mobile terminal~~electronic apparatus~~ according to claim 1, said liquid crystal device being a transfective liquid crystal display device.

6. (Amended) The mobile terminal~~electronic apparatus~~ according to claim 1, said liquid crystal device being a reflective liquid crystal display device.

7. (Amended) The mobile terminal~~electronic apparatus~~ according to claim 1, said liquid crystal device being driven by a simple matrix driving method.

36
cont

8. (Amended) The mobile terminal~~electronic apparatus~~ according to claim 1, said liquid crystal device being driven by an active matrix driving method.

9. (Amended) The mobile terminal~~electronic apparatus~~ according to claim 1, said liquid crystal device being a monochrome display.

10. (Amended) The mobile terminal~~electronic apparatus~~ according to claim 1, said liquid crystal device being a color display.

11. (Amended) The mobile terminal~~electronic apparatus~~ according to claim 1, the organic electroluminescent device being used as a light source for said liquid crystal device.

12. (Amended) The mobile terminal~~electronic apparatus~~ according to claim 1, further comprising a device that switches display between said liquid crystal device and said organic electroluminescent device.

13. (Amended) The mobile terminal~~electronic apparatus~~ according to claim 1, further comprising a battery provided in the electronic apparatus and a device that suspends display by said organic electroluminescent device and that switches automatically display by said liquid crystal device, when a remaining charge of the battery provided in said electronic apparatus becomes a predetermined remaining charge.

14. (Amended) The mobile terminal~~electronic apparatus~~ according to claim 1, further comprising a device that switches display from said organic electroluminescent device to said liquid crystal device when said organic electroluminescent display is not manipulated for a predetermined period while said organic electroluminescent display is continuously driven.

Please add the following new claims as follows:

15. (New) The mobile terminal according to claim 1, the organic electroluminescent device including red, green and blue light emitting organic electroluminescent elements.

16. (New) The mobile terminal according to claim 1, the organic electroluminescent display automatically turned OFF when the mobile terminal is folded from the opened state.

17. (New) The mobile terminal according to claim 1, the organic electroluminescent device automatically turned ON when mobile terminal is opened from the folded state.
